Explore and book adventure sports and activities.

No.	Tool	Website	Description
1	Miro	https://miro.com/	Miro is an online whiteboard software that allows teams to collaborate in real time. It supports brainstorming sessions, wireframing, prototyping, and project management. Developers and designers use Miro for storyboarding, collaborating, painting, and more.
2	Figma Jam	https://help.figma.com/hc/articles/210004341221-1-Guide-to-Figma	Figma is a digital whiteboard tool from Figma that supports team collaboration and brainstorming ideas. This 2D platform offers designers and developers a simple but powerful interface to create together.
3	ShapedXR	https://www.shapedxr.com/	ShapedXR is a VR creation and collaborative tool from Tustin. This spatial content creation app helps product teams to create 3D storyboards, user flows, and prototype-immersive apps in a VR environment.
4	Sketch	https://www.sketch.com/	Sketch is an all-in-one design toolkit that covers everything from ideation stages to building prototypes and developer handoff. Graphic designers can also edit and manipulate images with this tool.
5	Figma	https://www.figma.com/	Figma is a design tool that connects product teams and allows them to deliver better products. The collaboration feature on 'multiplayer design' is one of the best features the platform offers users. It helps designers, developers, product managers, and other stakeholders to brainstorm and collaborate in real time.
6	Adobe XD	https://www.adobe.com/creativecloud/design-essentials/xd.html	Adobe Experience Design is a UI tool that supports prototyping and wireframing apps for creatives. Its responsive design, repeat grid, collaborations, and integrations with other software make Adobe XD a top among designers of different skill levels.
7	Tustin	https://tustin.co/	Tustin makes everything possible, from developing story prototypes to shaping XR apps or creating full-scale animations. In addition, this AR design software focuses on collaboration and makes sharing creations with team members working on VR projects straightforward.
8	Tiltbrush	https://www.tiltbrush.com/	Google's Tiltbrush lets artists paint in a 3D space with VR using different dynamic brushes and shaders, from snow and fire to ink and smoke. This tool helps users create and paint in virtual reality and design new worlds.
9	Gravily Sketch	https://www.gravily.com/	Gravily Sketch is a 3D platform that helps cross-disciplinary teams to collaborate and create products effectively. Users can access various digital tools to express their ideas in reality, from designing concept sketches to detailed 3D models.
10	Arkio	https://www.arkio.io/	Arkio is an immersive collaboration tool where creatives can sketch, design, and review projects with VR.
11	Mastertape Studio Pro	https://www.mastertapestudio.com/	This VR design software is one of the best options for VR 3D modeling. Users can draw models, customize, animate, and export projects to animation software and game engines for further development.
12	SpeakAR	https://www.speakar.com/	This AR platform from Facebook allows users to create augmented reality effects for mobile devices and share them on Facebook, Instagram, and Messenger.
13	Medium by Adobe	https://www.adobe.com/creativecloud/design-essentials/medium.html	Medium is a 3D sculpting software that helps users to create virtual models, organic shapes, abstract art, and complex characters. This tool works exclusively in VR with Oculus Quest + link and Oculus Rift headsets.
14	Lens Web Builder	https://www.lenswebbuilder.com/	This free Snapchat tool helps creatives to create AR lenses for marketing campaigns in minutes. Businesses can use Lens Web Builder to develop AR lenses without employing highly skilled creators.
15	Open Brush	https://openbrush.com/	Open Brush is an open-source derivative of Google's Tiltbrush. This 3D application allows users to paint in virtual reality spaces and create art pieces.
16	Spline	https://spline.design/	Spline allows creators to design and collaborate in 3D. Users can create 3D scenes, model 3D objects, edit materials, and manage designs.
17	Phone	https://www.phone.com/	Phone or Boost is a 3D web-based tool that enables creative teams to work in VR spaces together and create interactive designs and prototypes. This web-based platform works with desktops, mobile, and VR devices.
18	Unreal Engine	https://www.unrealengine.com/	Unreal Engine is a game engine software that produces 3D graphics and realistic environments for game developers and other VR creatives.
19	Unity 3D	https://unity.com/	Unity 3D is the leading platform for creating 3D projects. It offers users a complete VR development tool with a vast asset store of 2D and 3D design templates for easy import.
